# CLUB HOUSE PROPOSAL

**OVERVIEW**

We are proposing to construct a new club house facility which would include a pro shop, restaurant and banquet facility with a capacity of 150.

The new building will compliment the well-known and desirable menu at the Mulligan's restaurant today.

**SUPPORT THE PROJECT**

This project will not be a reality without the support from people like yourselves! We are looking for support financially, as well as in-kind work through donations of material & labour. Thank you for the consideration!

**DETAILS**

- The stunning new clubhouse will feature an abundance of natural light with a view of the recently revamped Hole #9 and the new water feature
- New washrooms
- Parking lot improvements
- Estimated construction costs will be approximately \$1.75 million
- Target construction start date: Fall 2018
